

# Las Posas Basin Deep Groundwater Monitoring Well No. 2

## Update: August 05, 2019

### Week of August 05

Monitoring Well No. 2 will be constructed at 10968 Broadway Rd. in Moorpark, as shown on the map at left. Calleguas secured permission from the underlying property owner to construct the monitoring well. The new monitoring well will facilitate collection of groundwater elevation and water quality data to enhance on-going monitoring of wellfield operations at Calleguas' existing Las Posas Basin Aquifer Storage and Recovery (ASR) Wellfield, located south of this property at 6811 Grimes Canyon Road in Moorpark. The ASR project is used to store imported water in the aquifer for later use during outages of Calleguas' imported water supply. The monitoring well will not be used to pump groundwater for purposes other than water quality sampling.

During the week of August 05, the contractor may continue well development. These activities will be performed during daytime hours.

### How to Get Updates or Provide Comments

Updates on construction activities will be available at [www.calleguas.com](http://www.calleguas.com).

If you have any questions or comments about this project please contact 805.579.7128.

### Thank You for Your Patience

Calleguas and its contractor will take all feasible steps to minimize construction impacts on the public. Calleguas appreciates the patience and understanding of local residents and businesses during the construction of this vital water supply project.

**This update is based on the best information available at the time of publication. Construction is dependent on many variables, including weather, and this information is therefore subject to change.**
