

Lake Sherwood Pump Station Rehabilitation Construction Status Update Week of May 3, 2021

Calleguas Municipal Water District is working on a project to rehabilitate the Lake Sherwood Pump Station, which is located approximately 400 feet southwest of 493 Hillsborough Street in Thousand Oaks.

Week of May 3, 2020

During the week of May 3, Calleguas' contractor will be working at the pump station site and also at Calleguas' Lake Sherwood Reservoir, which is up the fire road away from Hillsborough Street. On Wednesday, May 5, 2021, Calleguas' contractor will be working long hours to install critical valves on the pump station piping. It is expected that work will begin at 7:00 a.m. and conclude by 9:00 p.m. on May 5th; however, there is a possibility that working hours may continue beyond 9:00 p.m. that night. Calleguas will do everything it can to minimize this impact to adjacent residences.

How to Get Updates or Provide Comments

For more information about the project, visit: <http://www.calleguas.com/projects/construction-updates.asp>.

Thank You for Your Patience

Calleguas and its contractor will take all feasible steps to minimize construction impacts on the public. Calleguas appreciates the patience and understanding of local residents and businesses during the construction of this vital water supply project.

This update is based on the best information available at the time of publication. Construction is dependent on many variables, including weather, and this information is therefore subject to change.
